

Integration of the substrate and AHP production process reducing raw materials and steps along the supply chain.

## OBJECTIVES

An innovative combination of production processes that allow the non-woven conversion and post-processing phases together with the final diaper assembly bringing a drastic environmental impact reduction on Absorbent Hygiene Products (AHPs) production.

## ALL-IN NEW FLOW

## IMPACT

LIFE ALL-IN solution is expected to drive restructuring of the AHPs sector, as well as the entire non-woven industry, as companies (including large industries and above all SMEs) will have the great chance to move to a lower cost business model together with a more environmental-friendly system:

- Up to 23% of raw material savings per year
- 10% of CO2 emissions reduction each year
- An annual cost reduction of 10%
